Drum

Design: Simon Pengelly

Drum

Design: Simon Pengelly

“Quietness, possibly above all else, is a quality all the best products possess, in that they don’t follow a trend; rather they exhibit a character born of thoughtful regard for function, material, environment, intuitiveness and familiarity... without the need to shout. There are few things more interesting and more exciting to us than being able to make our mark with quiet design.”

Drum upholstered base

Drum is a comprehensive, versatile and especially comfortable group of 'tub' chairs featuring slender and elegant upholstery in three sizes of shell, including a high back tub and generous low lounge chair versions.

Drum

swivel or castor bases

All of the tub chairs are available in a choice of five base options: an elegant fully upholstered 'floor length' version presenting several upholstery choices; a single column cruciform base, fixed on castors or swivel on glides in a choice of finishes; a cantilever base in a choice of finishes; and a 4-leg wood base in natural oak, which can be stained.

Drum

cantilever or wood bases

Drum is intended for use across a wide range of dining, meeting and waiting applications such as hotel lobbies and bedrooms, corporate meeting, reception and dining areas, and wherever people congregate and meet.

The collection

Chorus is a young company, working with a small group of renowned and talented designers, developing a collection of contemporary contract furniture designs. These designs find their application in the corporate, leisure, educational and hospitality sectors.
